Hi Thebao,

Hope you are well – I want to bring this to your attention – Anthony Palazzo is honestly the best professor Schack Institute of Real Estate has employed.

I am a first year Schack graduate student from Taiwan.

Being as an international student, I have been going through a difficult time to pick up real estate knowledge in every aspect - JV partnership, deal structure, real estate contract and law - in United States as they are quite different from what I used to learn back in my home country. However, Anthony made my learning experience pleasant as he used tremendous actual examples to demonstrate each esoteric topic, which made the content easier to understand. Further, he is always patient and is willing to share, not only his personal experiences but the related files or documents. Last but not least, the speakers he invites to the class are the real world big shots who are willing to answer all the questions we have. Real Estate Investment Opportunities and Deal Structure taught by Professor Anthony is by far the most resourceful and the best class I have ever taken since I was accepted by Schack Institute of Real Estate.

I would strongly suggest the administrative office to co-work with Professor Anthony to arrange more classes in the following semesters so more students can benefit from it. Also, I would highly recommend his class to any student looking for learning in real estate and of course Anthony has my strongest support.

Thank you very much and wish you have a nice day!
